Equal Treatment Law

The use of the male form when referring to persons or functionaries in the following text does not mean a gender-specific definition. Members of both sexes should be addressed on an equal footing.

General Notes

The release integrates new functionalities, optimizations and bug fixes into the software.

Please read these release notes to be up-to-date concerning the new program version and to get important information on handling new functions. Detailed information on using the system components can be found in the Content Author Guide, which is stored directly in the Content Management System and updated continuously

https://author.prod.an-cms.com/assetdetails.html/content/dam/aldi/global/guides-and-documentation/Content-Author-Guide_EN.pdf

The Firefox browser in the latest version is to be used as the standard browser while working in the AEM (see also: Chapter B 1. Author environments)

If you have any questions about this update, please contact MRM / McCANN external support at aldi-support@mrm-mccann.de

02.

**New Features,
important notes and
bugfixes**

Topics:

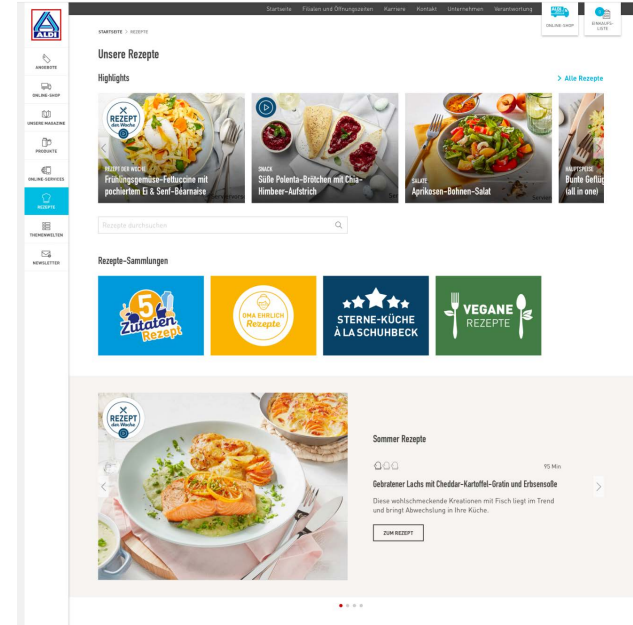

- New Recipe Landing Page Template
- Recipe Special Slider
- Enhancement Article Section
- Enhancement Contact Form
- Enhancement Articles: Sold out banderole
- Enhancement Article Filter Tracking
- Bugfixes
- Important Information

New Recipe Landing Page Template:

A new template will be available with this release for the new recipe page. The new template can be created under the consumer Home page and will have a fixed H1 under the breadcrumb which will be generated automatically from the Page title. Also fixed in the template will be the recipe slider under the H1 and recipe Overview Component.

Recipe Slider:

- Non sticky behavior
- Headline (optional)
- Textlink "all recipes" can be activated on the right side of the headline row which links to all recipes mentioned in the slider (optional)
- Headline, text and image of the slides can be integrated by the recipe URL but still can be edited as wished by the author
- A checkbox called "Show Video-Icon on Slide" can be activated by the author if the recipe contains a video, if the checkbox is activated a video icon will be displayed on the regarding slide

Content Author Guide Chapter

E 1

C 19.5

Enhancement Articles: Display of "Sold-out" banderole

The "Sold-out" banderole which had up until now only be available for external articles can now also be used for internal articles. To show it on the article tile the checkbox "Sold out" within the Page Properties of the article template needs to be checked. Setting the checkbox does not have an impact on the approval status of the article. The text displayed on the banderole needs to be specified within the Page Properties of the Language Page in the tab Articles.

Content Author Guide Chapter

E 2.3.1

Enhancement Article Filter Tracking

The tracking on the article filter had been optimized, so it is now possible to track how the filter is used by the customers. This applies for the filter on the promotion as well as on the product templates.

Content Author Guide Chapter

Bugfixes

User Feedback Component: The Feedback component can now only be integrated on the Promotion Week Page. Furthermore, the space between checkbox and text area is now correct and same as the space between headline and first checkbox.

Scrolling behavior "Show more - Show less" buttons: When clicking on the Show more or Show less buttons on the new Promotion Pages the scrolling behavior was not consistent. This has been fixed.

Article Overview and Search (within AEM): When switching to the new promotion pages the article search was no longer displaying the articles integrated on the new promotion pages. This has now been fixed.

Timer Dashboard: The new Promotion Pages are now also listed in the Timer Dashboard.

Article Import BE: When importing articles with the price field hidden, the checkbox stayed checked even if a second import wasn't set to a hidden price. This has been fixed.

Important Information

Correction of URL: Within the CR area for ES a URL has been corrected.
